SCORPION RIDERS
#013

BEYOND
THE VICTORY
THE PERFORMANCE*

SCORPION[®] EXO

WHEN CHOOSING A SCORPION...

it's much more than buying a great design or a well built helmet. It is to assert a vision of the brand attached to your make of helmet, the partner of your safety and of your pleasure in everyday life. This philosophy can be summarized in five words: Protection, Aesthetics, Dynamism, Comfort and Innovation. Five values which feature on each of our models, and which you find everyday in the helmets which carry the SCORPION logo.

RANGE SCORPION EXO[®] 2014

THE STING THAT FURTHER ENHANCES YOUR PASSION!

It has taken SCORPION EXO only 7 years to conquer the motorcycle, scooter and quad bike helmet market in Europe, thanks to a state-of-the-art range, and new concepts designed to revolutionize your level of comfort and safety on a daily basis. Tested and approved by top riders on all kinds of tracks, but especially by a public won over by helmets that are as attractive as they are effective,

SCORPION EXO stands for the NEW GENERATION helmet! Airfit[®] inflation system, Pinlock MaxVision[®] faceshield, ultralight and even tougher TCT[®] fibre structures, clean and sleek lines, almost «customized» paintwork designs, noble and efficient materials, unbeatable value for money, three-year warranty... at SCORPION, we are never big-headed when it comes

to your safety and your enjoyment! A signature brand which makes SCORPION EXO the choice of experts. On the street or the track (Exo series) all the way to off-road use (VX series), there must be a Scorpion made for you! Then, get stung!!

SCORPION EXO TECHNOLOGIES SAVE TIME ... WE ARE IN ADVANCE!

SCORPION EXO 2014 TECHNOLOGIES PENDING CERTIFICATION

SCORPION EXOLEDLITE® ENLIGHTENED INNOVATION!

Among the technological revolutions brought by Scorpion Exo in the world of helmets, this one is undoubtedly the most dazzling: EXOLEDLITE LED lighting! Much more than just a bright gadget, EXOLEDLITE by Scorpion leads the way into a bright future of smart helmets, not only designed to increase your visibility in traffic, but also to inform the other road users of your changes of pace.

On the sides of the helmet, outstanding white daytime lamps, comparable to those fitted on top-of-the-range cars, light up the markings of your Scorpion to give it an electrifying look, but that's not all! The quicker and higher the acceleration rate, the brighter the lights! At the back, a red light beam gradually gains intensity when you slow down, and even acts as a second brake light in a more sustained deceleration.

With its "lying man" function, the Scorpion EXOLEDLITE will also be able to detect an unusual non-vertical position such as for example if, after a fall, the motorcyclist is lying on the road. Your Scorpion will require a mere few seconds to grasp the urgency and begin flashing at the maximum of its power. An effective safety feature to warn other road users of your presence, at night especially, and thus avoid a further accident!!

This brilliant innovation, patented by Scorpion Exo and developed by in-house designer Spigaw, draws from state-of-the-art technologies with regard to lighting, built-in electronics and motion sensors. Nothing less than LEDs and optical fibres to light up your Scorpion. Ultra-light, very easy to recharge thanks to a connector at the base of the helmet, very effective and extremely thrifty in its power use, this advanced system does not impede in any way the strictest protection standards in the event of impact. An even more amazing, once stationary or in the OFF mode, no distinctive lighting element is visible on the outer shell of the helmet.

Even though the system is logically designed for applications on helmets but also on motorcycling and scooter riding clothing, Scorpion Exo does not hide the potential to branch out to other areas, such as cycling, roller skating, skiing and many more. An enlightened innovation which is bound to send electric shockwaves throughout the world of high-speed sports.

SCORPION HELMETS FEATURES

AIRFIT CONCEPT®

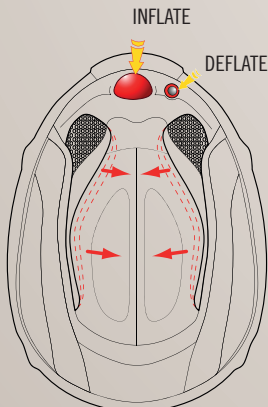

Fill your head with innovation!

Standard on : EXO-2000 Air / EXO-1000 Air / EXO-910 Air Transformer / EXO-500 Air / EXO-410 Air / EXO-300 Air / EXO-210 Air / VX-20 Air / VX-15 Air

A ScorpionExo® exclusivity available as standard on most models, inflate and deflate the cheek pads of your Scorpion to make it fit perfectly the shape of your face. The helmet thus snugly follows the shape of your cheeks, as if it had been moulded to your very own features. When it comes to safety, this optimised fit provides better protection and reduces helmet roll-off. On the other hand, the air cushion also improves protection in case of a shock. However this technology first of all revolutionises comfort, and at the same time provides two essential benefits: The guarantee of a quieter helmet free from parasitic noise, and a helmet that fits snugly for many years.

MAIN ADVANTAGES OF THE SCORPIONEXO® AIRFIT CONCEPT

- A custom-made helmet that perfectly fits the shape of your face.
- Thanks to inner padding that is less likely to flatten as a result of prolonged use, your Scorpion will remain a perfect fit throughout the years.
- An air-cushioning effect that counteracts impact and helmet roll-off more effectively.
- Better sealed, since it perfectly moulds the features of your face, your Scorpion is better insulated against noise, warmer in winter and less prone to annoying air flow.

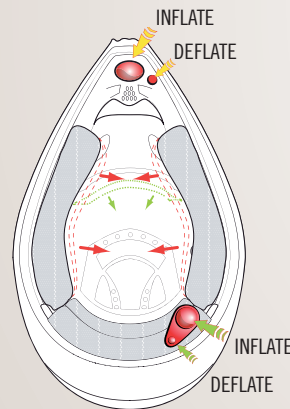

DUAL-AIRFIT

Be doubly effective!

Included on: VX-20 Air

With the Dual-Airfit® Scorpion once again outdistances the competition in the world of off-road helmets! Fitted as standard on the VX-20 Air, Scorpion's new flagship off-road, this technological feature actually manages to combine very effectively two Airfit® inflation pumps: one placed under the chinbar and acting on the cheek pads for a customised fit; and the second located at the back of the helmet, this time inflating or deflating the front section.

Developed with the advisory input of the best off-road riders of the international motocross and enduro scene, this innovation significantly enhances the fit of the helmet in a race situation, particularly when the exposed fabrics soak up moisture, mud and all kinds of impurities! A breath of fresh air in the world of off-road helmets, a revolutionary breakthrough that further enhances the freedom of your actions and your movements, even under the most extreme conditions.

CALOTTE TCT®

THERMODYNAMICAL COMPOSITE TECHNOLOGY

A new smart fibre!

Standard on : EXO-2000 Air / EXO-1000 Air / VX-20 Air

In addition to being extremely light, the new revolutionary TCT® structure offers unrivalled protection in the world of helmets. The smart fibre shell interacts with the variable density internal structure consisting of different materials. Like the cars used in crash tests, the new Scorpion VX-20 Air and EXO-1000 Air are designed to absorb as much energy as possible in the event of a shock: this is called interactive impact absorption! Now, the whole structure of your Scorpion, rather than only the shell, absorbs most of the shock, to ensure maximum protection for your head!

PINLOCK MAXVISION®

Show off

Standard on : EXO-2000 Air / EXO-1000 Air / EXO-500 Air

A must in order to face winter temperatures, the new Scorpion EXO-2000 Air, EXO-1000 Air and EXO-500 Air are fitted with the latest and most efficient anti-fogging technology: the Pinlock MaxVision®!

Although the Pinlock® lens fits perfectly into the faceshield of your Scorpion, two small transparent side eccentrics ensure that it will also keep holding over time. Fitting perfectly into the specially depressed area of the faceshield, designed to cover the whole faceshield area and intended for the first generations Exo-1000 Air, the Pinlock MaxVision® does not impair vision in any way. The assurance that you will see clearly, even under extreme conditions...

EVERCLEAR® NO-FOG FACESHIELD

EVERCLEAR® ANTI-FOG VISOR

It's so easy to see clearly!

Standard on : EXO-410 Air / EXO-300 Air
Good visibility is essential on a bike. All of the ScorpionExo® ranges of visors, as well as the optional tinted, are EverClear®. Uniquely, Scorpion sun visors are also treated with EverClear®, and this is on both sides. Made under licence by a Canadian company specialised in anti-fog treatment, that supply the American army, each visor is anti-scratch and has a special hydrophobic coating and exclusive thermo welding, that gets rid of the fog rapidly and effectively.

NEW ELLIP-TEC® FACESHIELD SYSTEM

Sculpted for racing!

Standard on: EXO-2000 Air / EXO-410 Air
Launched on the new Scorpion Racing EXO-2000 Air, the ELLIP-TEC® faceshield mechanism further improves the ease and speed of faceshield changes so unique to Scorpion. This operation can be done tool-less within 10 seconds, with the shield open. Wind tunnel designed to minimize wind noise at high speed, fitted with even more powerful springs to ensure optimum fit of the shield against the seal through the compression force, fully sealed and quieter, ELLIP TEC is also stronger to keep the shield in place in the event of a fall. This system will also be fitted to the EXO-410 Air.

3-POSITION VISOR LOCKING LEVER

Lock your comfort!

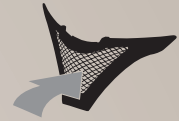

Standard on : EXO-2000 Air / EXO-1000 Air
EXO-500 Air

His latch is easy to use and allows you to lock the visor in closed position (position 1), to adjust it in any position (position 2), or to leave it slightly open so as to ensure sufficient ventilation (position 3). This last feature is particularly effective when the rain is falling steadily or in extreme conditions, especially compounded by high speed. Thanks to this ingenious system, your visual and auditory comfort remains unimpaired in all weathers and at all speeds, with ease!

REMOVABLE CHIN BAR AIR VENT

Fresh inspiration!

Standard on : VX-20 Air / VX-15 Air
A real breath of fresh air in the world of off-road helmets, the air vent in the chin bar of the new Scorpion VX-20 Air and its smaller model the VX-15 Air is brand new and answers the true constraints faced by riders! It can be removed in a snap in order to very easily take out the filter and clean it effectively. Reassembly is just as simple, as both disassembly and assembly take a few seconds.

SPEEDVIEW® SUNVISOR

SPEEDVIEW® NO-FOG RETRACTABLE SUNVISOR

Shine without being dazzled!

Standard on : EXO-1000 Air / EXO-910 Air
EXO-500 Air / EXO-100

The ideal accessory when the sunlight is very bright. Treated with anti-fog coating on both sides; lower it when the sun is in your eyes. Lift it up when the sun is gone. Easy to replace, with anti-fog coating (except EXO-100), available in several colours.

SPEEDVIEW3.0® NO-FOG RETRACTABLE SUNVISOR

For your eyes only!

En série sur : EXO-300 Air / EXO-210 Air
Available exclusively on the new Scorpion EXO-300 Air and EXO-210 Air, the patented SpeedView3.0® retractable internal sunvisor is cleverly height adjustable in three positions to provide customized visual comfort. In practice, a side screw is used to stop the travel of the sunvisor, with a choice of three preset points. Once you have adjusted this travel for optimum visibility, the SpeedView3.0® sunvisor will drop down to this exact position whenever you use it.

SPEEDSHIFT® SHIELD SYSTEM

SPEEDSHIFT® VISOR SYSTEM FOR QUICK CHANGES

Changing the visor is child's play!

Standard on: EXO-1000 Air / EXO-500 Air /
EXO-300 Air / EXO-210 Air

With this unique system the visor can be changed in less than 10 seconds. With the visor open, it's enough to just turn the two twist grips by 1/4 to remove it. To replace it the operation is just as simple. The visor clips on automatically around the twist grips by simply pressing it on. Easy, reliable and clever.

SAS® AUTO ADJUSTING SHIELD SYSTEM

**The intersection that combines
business and pleasure!**

Standard on: all full-face street models,
except EXO-910 Air

A major innovation to ensure a perfect seal and optimize the aerodynamics of your Scorpion at high speed, the faceshield automatically presses against the inner shell when closed, thanks to powerful springs directly mounted into the side supports. The shield perfectly sits against the joint, compressing it over the whole of its surface for a total seal, and optimum noise reduction.

SCORPION AIR CHANNEL

Scorpion creates dynamic ventilation!

Tested in a wind-tunnel, the streamlined design of Scorpion helmets appears to be the work of the wind itself! And this is not only an impression! In addition to the aerodynamics achieved in the IndyCar wind tunnel of Dan Gurney's All American Racers, the ventilation system of the Street and Off-road ranges is an integral part of your Scorpion, right from the design stage, for maximum efficiency. Several adjustable intake vents in the front propel the fresh air through channels moulded inside the internal EPS foam liner, in order to dissipate immediately the heat accumulated in the textile, as well as on to the faceshield to prevent the formation of condensation.

Each air intake vent is matched with its own exit vent, creating a dynamic circulation, which not only avoids turbulence at high speed, but also constantly regenerates the air. To achieve that, advanced air outlets in the rear spoiler and on the sides expel the heated air outside your Scorpion, while contributing to the optimum fit of the helmet on your head, and reducing parasitic noise.

KWIKWICK2®
LINER

KWIKWICK2® LINER

Keep a cool head, softly!

Standard on : all 2014 models

To significantly improve your comfort whether on or off road, the ScorpionExo® engineering office recently launched the KwikWick2®: a revolutionary fabric liner known for offering the best moisture-wicking capability and optimum skin breathability. Very effective, hypoallergenic, removable, machine washable, and as soft and pleasant to the touch as velvet, the lining of the new ScorpionExo® 2014 range is a real custom-made slipper for your head.

DOUBLE D®
BUCKLE TITANIUM

DOUBLE-D BUCKLE QUICK RELEASE CHIN STRAP

Latch on to the best safety there is!

Standard on : EXO-2000 Air /
VX-20 Air

As a proven system on roads and approved for off-road certification, the Double-D buckle chin strap is naturally fitted to the sporty Scorpion helmets. Featuring a wide and comfortable strap combined with a clever and intuitive quick release buckle that can be handled even with gloves, simply enjoy the best chin strap system there is. The ultimate detail on the top-of-the-range Street and Off-road Racing models: the Scorpion EXO-2000 Air and VX-20 Air will now be fitted with ultra-light titanium Double-D buckles!

ULTRA FLEXIBLE AND REMOVABLE NOSE DEFLECTOR

For more comfort, follow your nose!

Standard on : all on-road models,
except Open Face and Crossover

A little something that seems minor but makes a big difference in many situations, particularly when the temperature gradually drops! Breathing comfort, reduced fogging-up effect, significantly improved visibility: with your Scorpion helmet, your comfort and safety always come first.

NECKBRACE COMPATIBLE CIRCULAR PADDING

Protect your neck!

Standard on : VX-20 Air / VX-15 Air

Designed to fit perfectly when wearing NeckBrace protection; the base padding of the new Scorpion VX was designed and developed according to the precise specifications of the cervical protection standard. Thanks to its wide lower section, it provides a perfect seal for the NeckBrace in case of impact, thus ensuring optimum safety, while enhancing your comfort and freedom of movement in action.

TRIPLE DENSITY FOAM PADS

Enough padding makes a big difference!

Standard on: all models

Because a helmet is both an essential requirement and the element that is crucial to your safety on a bike, it must first be comfortable. Three layers of foam enhance comfort by optimising the rigidity and effectiveness of the fit over time, so you can stay focused on what really counts: your riding pleasure!!

QUICK RELEASE® MICROMETRIC CHIN STRAP

Safety goes up a notch!

Standard on : EXO-910 Air / EXO-500 Air /
EXO-410 Air / EXO-300 Air / EXO-210 Air /
EXO-100

Efficient and clever, this system makes it easier to adjust, lock and unlock the chin strap of your Scorpion, for user-friendliness in everyday use, and optimal protection. Even with gloves, the guide rail of the chin strap is very intuitive: adjusting the tightness is done via micrometric safety catches to further enhance the comfort and fit of your Scorpion. The real innovation is the release system which, thanks to a small flexible tab that is easy to find and handle, frees the catch in the blink of an eye.

REMOVABLE CHIN COVER

Laugh at the cold and at annoying noises!

Standard on: all on-road models,

except EXO-100 / EXO-210 Air / EXO-300 Air
Even at an unbeatable price, Scorpion helmets do not cut any corners when it comes to your comfort. Flexible, soft, and placed at the lower end of the chin bar to avoid any discomfort, the removable chin cover will protect your face from unpleasant drafts. It helps reduce the amount of air flowing through the helmet and keeps it even to increase warmth and quietness, whatever the speed.

EXOLON®
UNBREAKABLE VISOR

EXOLON® VISOR BY SCORPION

The shape memory peak

Standard on : VX-20 Air

Besides being large, light, anti-reflective, aerodynamic and designed with air-flow channels to reduce the wind surface area., the peak of the Scorpion VX-20 Air revolutionises the universe of the Off-road helmet. Totally deformable and unbreakable, fixed via screws designed to break in case of violent impact, the peak EXOLON is spectacular of efficiency. A new reference which places your safety and your field of view on the top of the podium!

STYLED FOR SPEED...

Directly escaped from the speed circuits, this is the most advanced and fastest predator ever designed by Scorpion, genetically engineered to win. Code name: SCORPION EXO-2000 Air.

With its streamlined and slender look, a brand new TCT® composite fibre shell, featherweight, fitted with a titanium Double-D buckle chin-strap, and better still a new wind-tunnel tested Ellip-Tec® faceshield change and locking mechanism, even when stationary, this new Scorpion looks ready to race!

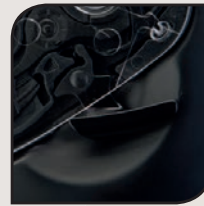

As for Comfort, it was given great emphasis by Scorpion engineers, and reached a new level in the world of full face helmets. Wrapped in the pullman softness of the new fabrics, your head is held in haute-couture comfort. The broad faceshield is fitted with Pinlock MaxVision® and eccentrics for the tear-off posts. The Scorpion Air Channel® dynamic ventilation channel system ensures perfect cooling across the helmet, even under extreme conditions. Finally, the Airfit® inflation system, involving inflatable cheek pads, shapes the inside of your Exo-2000 Air for a perfect fit!

The future standard bearer of the most talented speed racing riders and designed to very quickly join the crème de la crème in Motor Bike GP, Scorpion's new Racing weapon is ready to pounce with no less than 5 deco styles bearing the evocative names of PERFORMER, SHIFTER, POWERGY, CIRCUIT, and POLEMAN, also complemented by basic colour models under the SOLID name. In total, no fewer than 15 colour variations to reveal the beast in you!

With the new SCORPION EXO-2000 Air, get the style... for speed!

A BREATH AHEAD!

The jewel of the on-road range and the first helmet in the world to have incorporated Airfit® technology, the Scorpion Exo-1000 Air makes a dramatic comeback in 2011 with the all new Type E11 model! Lighter and offering intelligent resistance against impact with a unique tri-composite fibre shell with TCT® structure, softer and more comfortable to wear, easier to put on or remove, with improved ventilation and noise insulation, the Scorpion EXO-1000 Air Type E11 definitely expands its lead over the competition. The new visor now includes a Pinlock MaxVision®, enough to win over the most demanding bikers, for everyday use or on long journeys. With the new Scorpion EXO-1000 Air, take your biking passion to new heights with what is certainly the best GT full face helmet on the market!!

EXO-910 AIR**

THE MODUL'AIR

Sporty and refined look, lightweight, designer comfort, removable modular chinbar, the new Scorpion Exo-910 Air has evolved to become the next generation Scorpion "Transformer".

It is equipped with as standard a Pinlock lens, internal double-sided anti-fog coated sunvisor, micrometric chinstrap which is more intuitive than ever. The inner lining and the fit were designed with very close attention, with triple-density foams covered with a very soft fabric for comfort, to perfectly suit your head. The Scorpion inflation pump "Airfit" also works on the neck-roll for a perfect fit.

This helmet is extremely quiet, even at high speed, with excellent weight balance. A latest generation thermoplastic shell is used in Exo-910 Air, to improve the shock absorption and is significantly lighter in weight than its predecessor.

With Exo-910 Air, leave the city behind and explore the open road on your motorbike or scooter...

**SCORPION
EXO-500 AIR**

**THE DNA OF
A BEST SELL AIR!!**

Recently released on our roads, the new Scorpion EXO-500 Air has been incredibly successful ever since its launch. Even though priced towards the entry point in the range, the new Scorpion EXO-500 Air embodies the best of the technology developed by ScorpionExo®. Beneath its modern and sleek design, it features the next generation visor borrowed from big brother Scorpion EXO-1000 Air E11, and includes as standard the new Pinlock MaxVision®. It also integrates the SpeedView® built-in retractable sunvisor treated with anti-fog coating on both sides.

Two accessories usually reserved for high-end helmets! With 3 liners and a light and durable shell, the Scorpion EXO-500 Air dramatically changes the standards you would expect from a full face helmet at this position in the range! Equipped with the revolutionary Airfit® system and the new, soft and effective KwikWick2® liner, this new Scorpion will steal the show from the much more expensive helmets among those daily users who want to buy the market's best helmet for the best price!

SOLID

**SCORPION
EXO-410 AIR**

**PREMIUM
AS STANDARD!**

The latest addition to the street range, the SCORPION EXO-410 Air definitely looks like the most aggressive predator on the market. A Scorpion which instantly exceeds anything you would expect from a full face helmet of the lower end of the range. With a devastating, contemporary and sporty look, emphasised by the state-of-the-art Ellip-Tec® visor system launched on the top-of-the-range Scorpion Racing EXO-2000 Air, the new EXO-410 Air plays to win when it comes to style. Limited weight thanks to a shell using the latest generation injection-moulded thermoplastics, aerodynamic vents coupled with Scorpion Air Channel® technology, a lever to lock the visor in a slightly open or closed position... From the very first glance some details demonstrate how much care Scorpion Exo dedicated to its latest brainchild. In terms of comfort, the SCORPION EXO-410 Air is on a par with Premium helmets: latest generation Airfit® inflation pump for cheek pads, triple density foam pads covered with soft, hypoallergenic and machine washable KwikWick2® quilted liner, quick release intuitive micrometric chin-strap, EverClear® visor with no-fog coating on both sides, removable nose and chin guards... Treat yourself to the helmet that will exceed your expectations with the new SCORPION EXO-410 Air!

**EXPERIENCE
AERODYNAMIC
CROSSOVERS!**

Below the sleek looks of an intergalactic adventurer, this is the Crossover by Scorpion! Landing straight from the future in terms of style, comfort and innovations, this highly anticipated model is certified in both Open Face and Full Face configurations! A featherweight, featuring a chin bar removable in a snap matched with the external design, a super soft KwikWick2® liner and Airfit® system used to inflate the upper neck brace, the Scorpion Exo-300 Air bets on both comfort and style!

Fitted with a retractable no-fog internal sunvisor, height adjustable in 3 positions, which makes it possible to once and for all custom fit the position of the sunvisor to the wearer's face, not only does the Scorpion EXO-300 Air try to mimic the concept of its prey, it makes it its own and creates the ultimate creature, the perfect mutation of a multi-configuration helmet, achieving unequalled comfort whatever the use.

Beware of this new Scorpion which promises to be very effective and attractive!

////////////////////////////////////
IN THE AIR

With the EXO-210 Air, Scorpion launches the most stylish Open Face on the market! Taking its inspiration from "Air Force" helmets to sublime heights, this new addition will drive away the blandness associated with street models which ultimately all look alike. Reach new heights in terms of style, with maximum fun and protection in your daily life. Lightweight, ventilated, very comfortable with its triple density inner foam pads covered with the new soft moisture-wicking KwickWick2® liner, developed in the wind-tunnel for excellent air penetration even with the shield in the open position; if we stop the list there, it matches and still exceeds the market standards! Yet, with its retractable internal sunvisor, also height adjustable in three positions, its Airfit® inflation pump system which allows this new Scorpion to perfectly fit the shape of your head for unparalleled comfort, its smart recesses for earphones or Intercom, its sleek or mesmerizing paintwork and its attractive price, the Scorpion EXO-210 Air holds all the aces to fly high over the competition, taking your enjoyment to great heights...

**BECAUSE NOTHING
REPLACES THE
ORIGINAL...**

The essence of airy pleasures for those who dream of sunny getaways, the Scorpion EXO-100 was designed to increase thrills on two wheels tenfold. Beneath a very sleek design, true to the original Open Face spirit, the Scorpion EXO-100 emphasizes its looks with a removable peak, a standard tinted SpeedView® retractable visor, complemented with a clear screen supplied with your Scorpion. Enough features to shape your style to suit your moods. The interior enhancements are just as effective, including innovative moisture-wicking fabrics, and superb and unique embroidery.

Noble materials, leather effect, perfectly matched colours, from the shell to the fabrics, the "Italian style" open-face EXO-100 PADOVA exudes haute couture elegance, a top-of-the-range and very Dolce Vita signature for this urban, very trendy Scorpion.

Once tried, you're hooked! The SKULL design takes us to a much more shameless hidden face of this Scorpion, more demon than angel when speaking about look ! A venomous tattooed sting, for alert bad boys!

SCORPION
EXO®

**SCORPION
VX-20 AIR**

**SUCCESS
IS IN THE AIR !**

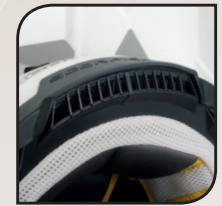

A new jewel in the Off-road segment, this serious challenger for off-road titles brings together Scorpion's state-of-the-art technology to seek victory. A new tri-composite fibre shell with TCT® structure for increased strength which will progressively crumple in case of a shock, a featherweight, and a spectacular, completely deformable and unbreakable EXOLON® visor, fastened with plastic screws designed to yield in the event of violent impact, these are the new references which rank your safety and your field of vision first on the finishing line! When it comes to comfort and features, once more the Scorpion VX-20 Air stays ahead of the game. In a world première, this is the first Scorpion equipped with Dual-Airfit® technology, featuring two inflation pumps: one placed under the chin bar and acting on the cheek pads for a customised fit; and the second located at the back of the helmet, this time inflating or deflating the front section. This is complemented by an inner lining and ultrasoft pads which are removable, washable and each supplied with a spare, a visor extension as standard, a Double-D titanium buckle chin-strap, and especially, a brand new and extremely efficient ventilation system, to keep a cool head whatever the circumstances! And because it is not gasping for air, it incorporates the new chin bar air vent launched on the VX-15 Air, which can be removed in a snap to clean the particles accumulated in the filter easily and without tools! Enough to raise the new Scorpion VX-20 Air to the rank of one of the best winning partners!

DUAL-AIRFIT BE DOUBLY EFFECTIVE!

With the Dual-Airfit® Scorpion once again outdistances the competition in the world of off-road helmets! Fitted as standard on the VX-20 Air, Scorpion's new flagship off-road, this technological feature actually manages to combine very effectively two Airfit® inflation pumps: one placed under the chin bar and acting on the cheek pads for a customised fit; and the second located at the back of the helmet, this time inflating or deflating the front section. Developed with the advisory input of the best off-road riders of the international motocross and enduro scene, this innovation significantly enhances the fit of the helmet in a race situation, particularly when the exposed fabrics soak up moisture, mud and all kinds of impurities! A breath of fresh air in the world of off-road helmets, a revolutionary breakthrough that further enhances the freedom of your actions and your movements, even under the most extreme conditions.

SYMPATHY FOR THE DEVIL !

Devilishly spiced up, the Scorpion VX-15 Air is such a success that, ever since its launch, it never ceases to create a buzz! With its big bad look, immediately recognizable because of its sharp curves, the Scorpion VX-15 Air leaves behind in the dust any competitor desperately trying to catch up! Equipped with NeckBrace compatible circular padding, soft KwikWick2® liner with excellent moisture-wicking properties, a Double-D buckle chin strap, it also features the latest generation Airfit® technology for a customised fit so that you can perform rapid sequences of movements flawlessly. A welcome innovation, it features a unique chin bar air vent, which can be removed in the blink of an eye so that particles accumulated in the filter can be cleaned easily!
